

# DANA TRANSPORT Safety Policy

Our most critical *Quality* requirement is our commitment to fully integrate Environmental, Health, Safety and Security (Safety) concerns into Dana Transport's management principles, systems and practices. We sustain this by...

- Establishing and publishing annual Safety goals.
- Corporate Management's confirming, supporting, and promoting these goals.
- Periodically reviewing performance against these goals.
- Communicating Safety performance results.
- Holding associates responsible for both goals and results.
- Improving our Safety performance, continually.
- Meeting or exceeding Safety/customer, regulatory, legal and other external and internal requirements, *responsibly*.
- Doing "right things right" the first time.
